INFO

This new release with Berlin based singer **May** is the latest addition in the collaboration series on **Robot Koch`**s Label **Trees and Cyborgs**.

May met Producer Robot Koch already in 2012 in Berlin. They co-wrote a few songs together and then loosely kept in touch after Koch relocated to LA in 2013. It wasn` t until 2017 that they got back together in the studio and recorded new material. Gold is the first song they wrote in 4 years. Recorded at the Red Bull Studio in Berlin, the music for Gold was composed by Robot Koch and his frequent collaborator **Julien Marchal**.

May`s fragile and yet present voice adds her own unique magic to the song.

Another highlight of the EP is the stripped down cover version of the **Moderat** Song „Bad Kindom“. Koch knows the Moderat guys since the early 2000`s now, has released on their **Monkeytown** Label and supported them live in the US. It was with their blessing that he and May made this heartfelt version of their biggest song as part of this EP.

Berlin based artist **Parra for Cuva`**s Remix for Gold could easily go between tracks by Bonobo or Kiasmos in a DJ Set, while **Natureboy Flako** shows that his influences go as wide as Vangelis and Dilla on his cinematic flip of the original.
