

SATORI & THE BAND FROM SPACE

Satori means enlightenment and energy. With his band, the artist has taken his signature earthy tones, so well recognised around the world, and has carefully adapted to a format offering more room for every individual piano, kora, kalimba and guitar-note to shine through. The Satori sound, defined as *electronic world music*, comes alive through the hands and feet of four skilled musicians in ways never seen before, peeling off even deeper hidden layers. The fusion of live electronics with instruments transforms the live experience into an unstoppable dance euphoria. Part of the music they play stems from Satori's highly acclaimed debut album 'MAKTUB', released on the revered Crosstown Rebels label. All four band members are integral to the creation process, playing a variety of instruments on the album which Satori then sculpted further to blend with his deep form of electronic sounds. The DNA of the music is so deeply embedded in the veins, flowing through these musicians so eloquently that they seemingly live and breathe the sounds as much as Satori himself. Satori & The Band From Space is a force to be reckoned with, an experience to immerse.
